

WASHINGTON INTERNSHIPS FOR STUDENTS OF ENGINEERING

About the Program:

- Nine-week summer internship in Washington, D.C.
- Perform self-guided research on an engineering-related public policy issue that is important to you and your sponsoring society
- Produce a policy paper based on your research
- Become more knowledgeable about the relationship between engineering and public policy
- Meet and interact with individuals from the U.S. Congress, Administration, federal agencies, industry, and prominent non-governmental organizations
- Become more involved with your engineering professional society
- Meet other engineering students from across the nation that are interested in engineering and public policy
- Receive a stipend and housing in D.C.
- Open to 3rd- and 4th-year undergraduate students and graduate students
- **Applications for Summer 2017 program due December 31 2016**

“The WISE program is a **once-in-a-lifetime opportunity**. I **strongly urge** any eligible candidates to apply. I learned more in the WISE program than I did from an internship in industry.”

— Keith White
Former WISE Intern

“...a **wonderful and enlightening** experience.”

— Preston Stinson
IEEE Student Member, WISE 2014
