

# Nanotechnology for Sustainable Agriculture - IDS 6261

Spring  
2020  
Thursdays,  
5:30 -  
8:00pm

A multi-disciplinary graduate level course dedicated to study the applications of nanotechnology in agriculture

- Are you interested in learn about the applications of nanotechnology in agriculture?
- Do you want to have lab, greenhouse and field experience?
- Are you willing to help solving “real world” problems on food production?

If you answered YES to at least one of these questions, you should enroll in our masters course and become part of the UCF - Materials Innovation for Sustainable Agriculture (MISA) team!
